

Sithira Janiya

Full Stack Developer Intern

 sithirajaniya87@gmail.com  +94 704 174 576  126, Gampaha, Sri Lanka  <https://github.com/sithira-janiya>
 <https://linkedin.com/in/sithira-janiya>  Personal Developer Portfolio

SUMMARY

Motivated **3rd-year IT undergraduate** with hands-on experience in **Full Stack Development** using **MERN Stack** and **Java technologies**. Experienced in building **web-based systems** including **lab management systems**, **boarding management systems**, and **job portals**. Skilled in **REST API development**, **database management**, and **Linux environments**. Seeking a **Full Stack Developer Internship** to apply technical skills and gain industry experience. Experienced in **web application development** and **software engineering practices**.

SKILLS

Programming Languages: Java, JavaScript, C, C++
Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot, MongoDB Java Driver
Databases: MongoDB, MongoDB Atlas, MySQL
Tools & Technologies: Git, GitHub, Postman, VS Code, MongoDB Compass
Operating Systems: Linux (CentOS, Ubuntu)
Core Concepts: REST API, CRUD Operations, OOP, MVC Architecture, Software Development Life Cycle (SDLC), NoSQL Databases, Data Modeling, Database Query Optimization, Aggregation Framework
Soft Skills: Team Collaboration, Problem Solving, Communication Skills, Time Management

EDUCATION

2023 – Present **BSc (Hons) Information Technology**
Sri Lanka Institute of Information Technology (SLIIT)

PROJECTS

03/2025 – 06/2025 **StayMate Boarding House Management System** 
Group Project | Full Stack Contributor | MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Developed a full stack boarding house management system for handling tenant registration, room allocation, and meal management
- Implemented secure user authentication and password hashing for user accounts
- Built RESTful APIs using Node.js and Express.js for backend functionality
- Designed MongoDB database schema for efficient data storage and retrieval
- Collaborated in a team environment using Git and Agile development practices
- GitHub: https://github.com/sithira-janiya/stay_mate.git 

07/2025 – 08/2025 **Club Master Management System** 
Individual Project | Java Web Application
- Developed a web-based system for managing club activities, member registrations, and event coordination
- Implemented CRUD operations for managing users, events, and records
- Designed backend logic and integrated database for efficient data handling
- Built user-friendly interfaces for managing club operations
- Developed scalable and maintainable web applications following best software engineering practices
- GitHub: <https://github.com/sithira-janiya/club-master.git> 

01/2026 – Present **Lab Management System** 
Individual Project | Java, MySQL, REST API, Linux
- Developing a role-based system for managing lab bookings, schedules, and test records
- Implementing backend services and RESTful APIs for system functionality
- Managing database operations for lab schedules, user data, and test information
- Deploying and testing the application in a Linux (CentOS) environment
- Collaborating using Git for version control and team development
- Designed system architecture and API structure for scalable backend development
- GitHub: <https://github.com/sithira-janiya/lab-system.git> 

02/2026 – Present **NextStep Job Portal Management System** 
Group Project | Full Stack Contributor | Node.js, Express.js, Next.js, PostgreSQL
- Contributing to the development of a full-featured job portal system supporting students, companies, and administrators
- Implemented authentication and role-based access control using JWT
- Developed backend modules for job postings, applications, and user management
- Built RESTful APIs and integrated PostgreSQL database for scalable data handling
- Collaborated in a team-based Agile environment using Git
- GitHub: <https://github.com/sithira-janiya/The-NextStep-Platform.git> 

02/2026 – Present

Smart Campus Management System

Group Project | Full Stack Contributor | Spring Boot, React, MySQL, JWT, OAuth

- Developing a full stack campus management system for facility booking and incident management
- Implemented role-based access control and authentication using JWT and Google OAuth
- Built backend services using Spring Boot and REST APIs
- Developed frontend interfaces using React and integrated API endpoints
- Managed database operations using MySQL for system data storage
- GitHub: https://github.com/sithira-janiya/it3030-paf-2026-smart-campus-group-PAF_WE_03_02.git 

04/2026 – Present

Personal Developer Portfolio

Technologies : React, Tailwind CSS, JavaScript, Vercel

- Developed and deployed a personal portfolio website to showcase projects, technical skills, certifications, and contact information. Designed with a modern responsive UI and deployed using Vercel.
- Live Demo: <https://portfolio-dun-kappa-31.vercel.app> 

CERTIFICATES

MongoDB Java Developer Path  — Completed the MongoDB Java Developer Path covering MongoDB Atlas, CRUD operations, aggregation pipelines, indexing, data modeling, and Java integration using the MongoDB Java Driver. Gained hands-on experience building database-driven Java applications with MongoDB. | **Certificate Link** : <https://ti-user-certificates.s3.amazonaws.com/ae62dcd7-abdc-4e90-a570-83eccba49043/59db1da0-c6ca-414c-ac3b-c4c92184b436-it23652200-silva-d-s-j-b1833a1d-3de4-4a95-a905-b7eeb5c3f2b1-certificate.pdf>
